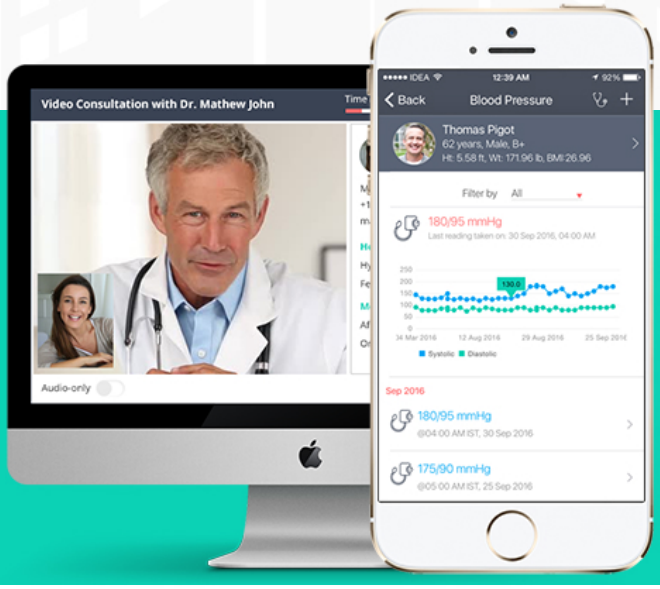
INTRODUCING

THE ENTERPRISE PLAN

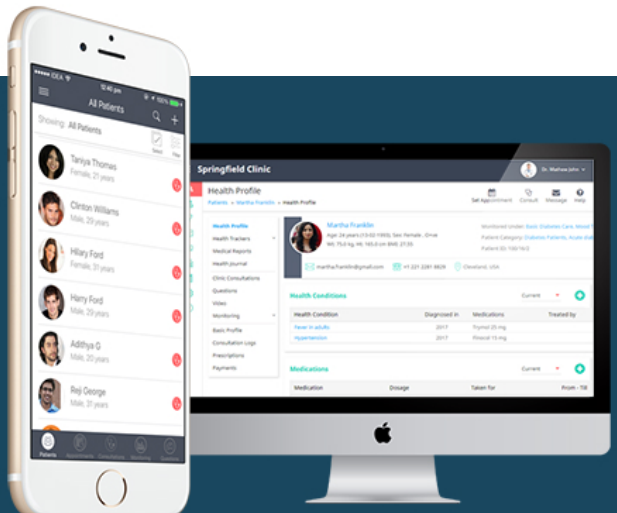
For Healthcare Organizations



Patient engagement for shared decision-making and better education of patients, has always been considered as the last mile in healthcare. Merely creating a website and mobile app that does not support better communication is not an effective digital health strategy for a healthcare organization. It is important to adopt a system to securely and privately connect your healthcare providers with your patients.

A CUSTOM BRANDED PATIENT APP FOR YOUR HEALTHCARE ORGANIZATION

It has become increasingly clear that established healthcare organizations need the additional support of a custom branded mobile application for their patients. Today, being accessible from your patients' phone is critical to building long term relationships with them. We have therefore created a new plan for healthcare enterprises, combining more offerings from our ContinuousCare platform.



WHAT IS IN THE ENTERPRISE PLAN

Four apps supported by our ContinuousCare platform provides your patients and medical team with all the features, notifications and data access they need in their daily work and interactions. Securely and conveniently.

FOR YOUR PATIENTS

- Custom branded Mobile App
- Web Patient Portal

FOR YOUR MEDICAL TEAM
